

B2B Grocery & Pharmacy System – Condensed Requirements

1. Core System Overview

- Unified platform for both grocery and pharmacy shops.
- Shops can manage inventory, sales, purchase orders, and billing.
- Shops can buy products directly from distributors inside the app.

2. Key Modules

A. Shop Dashboard

- Daily sales, total revenue, stock alerts.
- Separate tabs for grocery and pharmacy items.

B. Inventory Management

- Add / edit products.
- Barcode / QR code support.
- Low-stock warnings.

C. Purchase Order System

- Shopkeepers can order from multiple distributors.
- Order tracking, delivery status, and history.

D. Distributor Panel

- Add products with stock & pricing.
- Manage shop orders.
- Bulk order processing.

3. Pharmacy-Specific Features

- Medicine category structure (OTC, prescription, surgical).
- Batch number & expiry management.
- Alternative medicine suggestion (if possible, data needed).
- Medicine restrictions (e.g., special category flag).

4. Grocery-Specific Features

- Weight/quantity variants.
- Multi-unit system (kg, gm, liter, packet, box).
- Perishable item tracking.

5. POS (Point of Sale)

- Counter billing system.
- Barcode-based fast sales.
- Discount, offers, membership features.

6. B2B Marketplace

- One marketplace where all distributors upload goods.
- Shops can browse product list and buy instantly.
- Bulk order support.

7. Delivery & Logistics (Your Business Role)

- Your company will handle parcel delivery for shop → distributor.
- Delivery charge rules set by you.
- Delivery tracking for both sides.

8. Admin Panel (Your Organization's Role)

- Manage distributors and verify them.
- Approve shops.
- Commission rules for every order.
- Full reporting (orders, revenue, commissions, logistics).

9. Revenue Model (How You Earn)

- A. Commission from distributors per order.
- B. Delivery charge earnings.
- C. Subscription plan for shops (optional).
- D. Featured listing / promotion for distributors.

10. Mobile App Requirements

- Shop app (Android)
- Distributor app (Android)
- Delivery app (optional)
- Super Admin web panel
